Summer 2 Week 4 – 1st July 2022

## What have we been learning?

- ◆ We have been learning all about the **Diplodocus** dinosaur this week. We then wrote some facts about this huge dinosaur by ourselves. Mrs Short and Mrs Silvester were very proud of us for our super writing!
- ◆ In Maths this week we have been adding by counting on along a number line (up to 10 or 20) and then recording our addition calculations as number sentences.
- ◆ In our Understanding the World sessions we have been sorting different dinosaurs depending on what they ate. We now know the fancy words “**carnivore**” and “**herbivore**” and can explain what they both mean too!
- ◆ We have been continuing to learn lots of dinosaur facts by listening to the raps from “Andy’s Prehistoric Adventures” from CBeebies & joining in with the actions. *The link is on DB Primary if you fancy rapping along at Home too!*

Dinosaur activities...

Decorating dinosaur chalk boards in our Outside Area.

## A polite request...

On Monday the 4th of July, please can you send your child's clothing for our assembly into school inside a named carrier bag. This will really help us to ensure that the right items find their way home to you safely at the end of the week. Please keep working with your child to ensure that they know their words off by heart, thank you.

## Homework

### Literacy

- Sounds - Please keep revising all of the sounds using the little brown sound books.
- Reading books and sight words.
- Draw a picture of a Diplodocus & label the different parts of this dinosaur independently.

### Maths

- Play the Dinosaur adding game in your Yellow Book.
